Biometric Access Control Device Options

Hands down
the world's best biometric solutions

Lots Of Ways to use Palm Vein Scanning

On Desktops

Scanners come as a mouse, a mouse with a guide, a scanner with a guide or a U-Guide, good for counter tops or other locations.

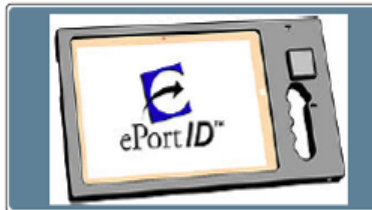

Attached to Doors

Attach to doors, walls and turnstiles. There is even a rugged unit for outside or very heavy industrial use.

Total Mobility

A scanner, Microsoft Surface Pro tablet and a sensor in one sleek, lightweight unit. It even has 3 extra USB ports so other devices can be plugged in like bar code scanners, payment modules, EKG's and ultrasound devices.

Kiosks

A kiosk can be used in many places. At an entrance to a building, at hospitals and medical clinics, government buildings, college dorms and in fact anywhere you want to manage access with self-registration.

CIC authorized reseller for ePortation ID (NAICS Code 334118 - Biometric Access Control Systems)
